

HUZAIFA AL-MASHHADANI

Full-Stack & Mobile Developer

Babylon, Iraq | +9647811930693 | prhuzafa@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven **Full-Stack & Mobile Developer** with extensive hands-on experience in building, scaling, and maintaining production-grade web and mobile applications . Proven expertise in developing REST APIs, real-time communication systems, administrative dashboards, and location-based tracking services . Well-versed in the full software development lifecycle (SDLC)—from application architecture and database design to third-party integrations, Linux server administration, and production troubleshooting . Strong technical foundation utilizing **Flutter, Dart, React, Next.js, Node.js, Express.js, Laravel, PostgreSQL, Prisma, Firebase, and modern cloud technologies** . Adept at delivering high-performance cross-platform applications, secure backend architectures, and seamless user experiences

TECHNICAL SKILLS

- **Mobile Development:** Flutter, Dart, React Native, BLoC/Cubit, Riverpod, Firebase Cloud Messaging, Push Notifications, Maps & Geolocation Services, REST API Integration, Real-Time Features, iOS & Android Deployment
 - **Frontend Development:** React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, React Query, Zustand, Responsive Web Design
 - **Backend Development:** Node.js, Express.js, Laravel, PHP, RESTful APIs, WebSockets, Socket.IO, Authentication Systems, Third-Party API Integration, Payment Gateway Integration .
 - **Databases & Caching:** PostgreSQL, MySQL, Prisma ORM, PostGIS, Redis, Relational Database Design, Data Modeling, Migrations, Geographic Spatial Data .
 - **DevOps & Infrastructure:** Linux, VPS Administration, Git, GitHub, PM2, Docker, Vercel, Cloudflare, SSL, Domain Configuration, Production Deployment Workflows .
 - **Architecture & Engineering:** Clean Architecture, Feature-First Architecture, State Management, API Design, Real-Time Event-Driven Architecture, Application Performance Optimization, Production Troubleshooting
-

PROFESSIONAL EXPERIENCE

Fadshi | Flutter Front-End Developer

Apr 2022 – Jul 2023

- Designed and executed mobile application user interfaces from scratch, successfully translating Figma design mockups into responsive, production-ready Flutter widgets and screens .
- Developed and maintained core mobile front-end features using Flutter and Dart, systematically enhancing existing screens, user experience, and UI design consistency .
- Built dynamic product listing and discovery interfaces supporting multiple product conditions (new, used, and bale) alongside advanced filtering and categorization utilities .
- Developed interactive analytics and statistics dashboards utilizing chart-based data visualizations to present platform sales data clearly to users .
- Implemented core application features including product details, order tracking, digital wallet balances, and withdrawal screens, connecting them with backend REST APIs and state management controllers .

- Collaborated with the backend team to build a real-time in-app chat module between buyers and customer support using WebSockets and Socket.IO .
- Integrated map and geolocation packages to build courier tracking features and location-based monitoring operations, improving location accuracy and reducing tracking latency via GPS filtering

Software Solutions | Full-Stack Developer

Nov 2023 – Mar 2025 | Iraq

- Contributed to the development and delivery of multiple production web applications in collaboration with a cross-functional engineering team using React.js, Laravel, PHP, and MySQL .
- Developed and maintained full-stack web solutions, implementing responsive user interfaces with React.js and reliable server-side business logic using Laravel and PHP .
- Expanded technical stack to Next.js by architecting "Al Rayyan," a production e-commerce platform in Iraq featuring complete product and inventory management systems, SEO optimization, and streamlined online purchasing workflows .
- Developed "Miswak," an enterprise e-commerce platform for a major Iraqi shopping mall, enabling digital catalog browsing and secure online shopping .
- Adopted Node.js to build "Hala Chat," a real-time messaging web application, gaining practical experience with real-time bidirectional communication, WebSockets, webhooks, and event-driven architecture .
- Designed, optimized, and maintained relational PostgreSQL databases, executing advanced queries, schema modeling, data migrations, and seamless backend integration

Dizli | Full-Stack & Mobile Developer

Jun 2026 – Present | Iraq

- Develop high-performance production Flutter applications, scalable backend services, and administrative dashboard systems for a comprehensive multi-service platform .
- Built feature-rich customer and driver mobile applications incorporating secure authentication, dynamic order processing, ride management, push notifications, digital wallets, rating systems, and advanced location services with REST API integration .
- Developed robust Node.js and Express.js backend APIs utilizing PostgreSQL, Prisma ORM, Redis, and PostGIS, powering real-time tracking, intelligent dispatching, trip management, and location-based spatial features .
- Engineered responsive Next.js administrative dashboards and managed Linux VPS production infrastructure using PM2, Cloudflare, SSL certificates, and optimized deployment workflows .
- Integrated Firebase Cloud Messaging (FCM) and critical third-party APIs, resolved complex production issues, and managed end-to-end iOS/Android application builds, code signing, and store releases

ADDITIONAL DEVELOPMENT EXPERIENCE

- Developed and maintained diverse web applications and backend systems utilizing Laravel, PHP, Node.js, Express.js, Next.js, MySQL, and PostgreSQL, focusing on secure REST API design and external service integrations
- Built cross-platform mobile apps using Flutter and React Native, applying structured state management patterns (BLoC/Cubit, Riverpod) alongside Clean Architecture and Feature-First methodologies .
- Configured and customized e-commerce solutions using WordPress, WooCommerce, Shopify, and BigCommerce .
- Maintained clean Git-based workflows, managed Linux server environments, monitored application health, performed API troubleshooting, and integrated third-party SDKs

LANGUAGES

- **English:** Fluent
- **Arabic:** Native
