

HUZAIFA AL-MASHHADANI

Full-Stack & Mobile Developer

✉ prhuzaifa@gmail.com ☎ 0693 193 781 964 📍 Al-Iskandariyah, Babylon, Iraq

PROFESSIONAL SUMMARY

Full-Stack and Mobile Developer with hands-on experience building production web and mobile applications, REST APIs, real-time systems, administrative dashboards, and location-based services. Experienced across the full software development lifecycle, from application architecture and database design to deployment, server management, and production troubleshooting. Strong experience with Flutter, Dart, React Native, Node.js, Laravel, Next.js, PostgreSQL, Prisma, Firebase, and modern web technologies.

WORK EXPERIENCE

Full-Stack & Mobile Developer

Jun 2026 – Present

Dizli · Iraq

- Develop Flutter applications for customers and drivers
- Build and maintain backend services using Node.js, Express.js, PostgreSQL, and Prisma
- Design and implement REST APIs for authentication, users, drivers, orders, rides, ratings, wallets, notifications, and admin operations
- Implement real-time driver location tracking and trip status management
- Develop taxi ordering, driver dispatch, and trip acceptance workflows
- Implement distance-based pricing and service zones
- Work with PostGIS for geographic and location-based functionality
- Integrate Firebase Cloud Messaging for customer and driver notifications
- Develop driver rating and customer feedback systems
- Implement driver wallet and commission functionality
- Integrate external payment services
- Develop administrative dashboards using Next.js, TypeScript, React Query, Zustand, and Tailwind CSS
- Manage production backend infrastructure on Linux VPS environments
- Use PM2 for Node.js process management and production monitoring
- Manage PostgreSQL databases, Prisma migrations, and production database changes
- Configure and troubleshoot domains, SSL, Cloudflare, CORS, APIs, and production deployments
- Diagnose production issues using server logs and application monitoring
- Prepare and release mobile applications for iOS and Android
- Work with iOS signing, builds, App Store submission, and production release troubleshooting
- Continuously improve application reliability, performance, and user experience

PROJECTS

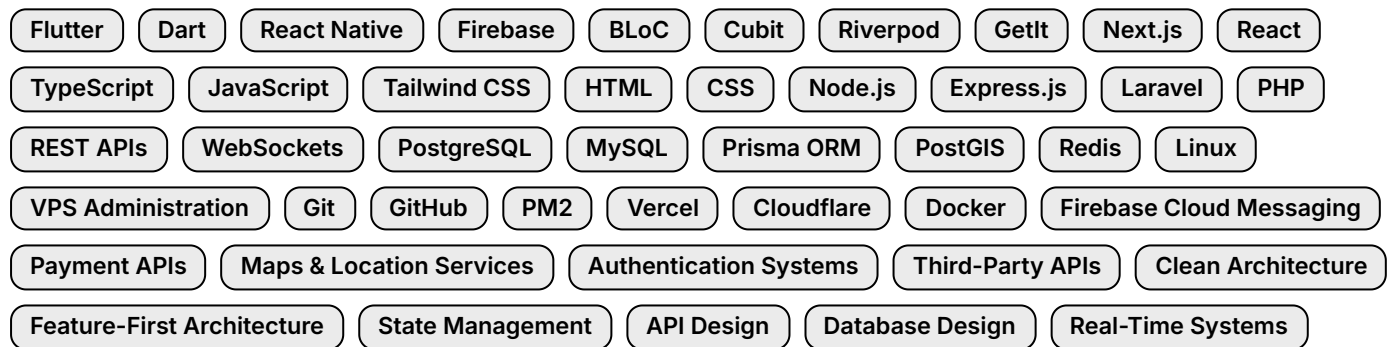

Dizli — Multi-Service Super App

A multi-service platform developed for the Iraqi market, combining multiple services within a single ecosystem

- Services
- Taxi transportation
- Delivery
- Courier services
- VIP transportation

- Shopping services
- Technical Highlights
- Customer and driver mobile applications
- Real-time driver location tracking
- Trip and order lifecycle management
- Driver dispatch and acceptance workflows
- Distance-based pricing and service zones
- Customer and driver rating systems
- Push notification infrastructure
- Authentication and user management
- Driver commission and wallet system
- Payment API integrations
- Administrative dashboard
- PostgreSQL database with PostGIS geographic functionality
- Production Node.js backend running on VPS infrastructure
- iOS and Android application deployment

SKILLS

LANGUAGES

English — Fluent

Arabic — Basic

WEB & BACKEND DEVELOPMENT EXPERIENCE

Experience developing and maintaining web applications and backend systems using

- PHP and Laravel
- Node.js and Express.js
- Next.js
- MySQL and PostgreSQL
- WordPress and WooCommerce
- Shopify
- BigCommerce
- REST APIs and third-party integrations
- Linux server deployment and maintenance

MOBILE DEVELOPMENT

Hands-on experience with Flutter and React Native, including

- Cross-platform application development
- BLoC/Cubit and Riverpod state management

- Clean Architecture and Feature-First Architecture
- Firebase integration
- Push notifications
- Maps and location services
- REST API integration
- Real-time application features
- iOS and Android release processes

ADDITIONAL INFORMATION

- Available for remote and international opportunities
- Experienced working across mobile, frontend, backend, databases, and deployment
- Comfortable troubleshooting production systems and server environments
